TOFFEE BROWN
Smart Slim Long

SSL30858

Ready to become a new classic, the three colour variants of the Smart Slim collection pick up on the natural tones that enhance the nature of oak. The lighter **Pure** shade brings an extra touch of light to rooms, while the more intense **Toffee Brown** tone goes perfectly with interiors with more character. The **Natural** variant, on the other hand, remains the preferred choice for those who like a clean, modern style.

Whether in **Classic** or **Long** format, Smart Slim is the right answer for those looking for a stable, environmentally friendly, durable and safe floor covering.

	SMART SLIM CLASSIC	SMART SLIM LONG
Dimension	910 x 145 x 10 mm	1820/2200* x 165 x 10 mm
Top layer	2,5 mm	2,5 mm
Core	HDF	HDF
Backing layer	2 mm - spruce	2 mm - spruce
Varnish finish	extra matt	extra matt
Grading	Unique ABC	Unique ABC
Bevel	No bevel	4V bevel
Joint	T+G	T+G
Planks/box	8 planks/box (1,056 m²)	6 planks/box=1,802 m² (1820* mm)

* The standard length of the collection is 1820 mm. In case of production variations, the size may vary from 1820 to 2200 mm.

Why give up the magic of wood when it comes to renovation? The Smart Slim line, thanks to its thickness of only 10 mm, offers all the versatility needed to be the perfect solution even when a floor of limited thickness is needed. Available in 2 sizes: **Classic** and **Long**, it guarantees stability, resistance and practicality.

The essence is Oak, lightly brushed to emphasise its tones. The finish is a highly resistant **extra-matt varnish** to fully restore the true beauty of wood.

Classification

Our product selection is Class Free according to EN 13489. The Smart Slim range has a Unique ABC selection. Since it is a natural material, the invitation is always to take these references with elasticity; on our part, we always make every effort to respect these parameters, compatible with the splendid variability offered by the raw material.

UNICA ABC

- FEATURES
Vivid colour variation
1. Possible multiple knots in a plank
 2. Medullary ray
 3. Medium-sized knots ($\leq 50\text{mm}$ medium)
 4. Dark line
 5. Sapwood $\leq 50\%$ of plank length

	UNICA ABC
COLOUR VARIATION	Vivid
MEDULLARY RAYS	Admitted
KNOTS SIZE	Approx. $\leq 50\text{ mm}$
QUANTITY OF KNOTS	Unlimited
DARK LINES SIZE	Unlimited
QUANTITY OF DARK LINES	$\leq 3/\text{m}$
CRACKS	Admitted; $\leq 3\text{mm}$ wide, $\leq 1/2$ the length of the plank
SAPWOOD SIZE	$\leq 50\%$ the length of the plank

WOOD CHARACTERISTICS

MEDULLARY KNOTS

The medullary rays are the channels that transport nutrients towards the centre of the trunk. These appear perpendicular to the wood grain.

STUCKED KNOT

The knot is puttied when unsound, in case it is sagging or rotten.

HEALTHY KNOT

Healthy knots are the remains of tree branches. After cutting and processing the wood, healthy knots have still retained their original core.

SAPWOOD

Sapwood is the outer and thus younger part of the trunk, which carries water and sap. It is generally lighter than the heartwood, the inner part of the trunk.

DARK LINES

The dark lines may be oblong knots or mineral streaks. These colour variations are often due to the tree's reaction to minerals in the soil or external factors.

WOOD GRAINS

Wood grains are the alternating lines of the wood, light/hard and dark/soft respectively, that form over the years of the tree's life. Depending on the cut, the grain can be straight or concentric.

GROUP OF KNOTS

A grouping of nodes closer than 10mm to each other. The area encompassing all nodes is considered as a single node.

CORE AND NATURAL CRACKS

The centre of the trunk is the oldest and generally darkest part of the tree. It is the driest area of the trunk, so it will more easily show natural cracks during floor work.

Bevel and finishing

Bevels define each individual plank, enhancing the style of your floor. Our Smart Slim Long collection offers planks with 4V bevels on all four sides, while Smart Slim Classic is only available in the 0V version.

0V BEVEL

4V BEVEL

FINISHING

You can install your floor without any further processing after installation. We only use varnishes that meet strict international emission standards, so you can enjoy your wooden floor knowing that it has been made in an environmentally friendly way.

EXTRA MATT VARNISH

Our extra matt varnish gives wood an untreated appearance with the high performance and low maintenance of a varnished floor.
