LEADING MANUFACTURER

Oak Flooring
Oak Doors
Oak Stairs
Oak Panels

Oak is our passion

We have extensive knowledge in timber production and a deep respect for oak. Oak is limited natural resource. We responsibly use mature timber to manufacture flooring, doors and stairs. We only use premium quality, matured oaks, over 120 – 140 years old which is processed at our sawmill. We ensure the highest levels of quality control from start to finish.

Why us?

Leading manufacturer of Premium Oak Flooring, Oak Doors, Oak Stairs, Oak Panels.
Guaranteed delivery of the finished products with a short lead-time.
Our prices are among the most competitive in the market.
Excellence is what we have become renowned for.

Oak flooring

Our engineered oak flooring is designed for maximum stability and is ideal for underfloor heating. We use environmentally friendly materials of the highest quality. Oak flooring is treated with a hard - wax oil and is extremely durable and easy to look after. Oak flooring brings a natural beauty and authenticity to any interior. It lasts a lifetime, whilst adding value to your home.

Designed to suit individual needs

Your imagination is the limit. Our craftsmen will satisfy even the most demanding customers. We manufacture and deliver our products according to customer needs and specifications. Human creativity only enhances nature's design.

Ideal for underfloor heating

Oakwood is a hardwood which is durable and has superior thermal conductivity properties. We manufacture two-layer and three-layer engineered oak planks which offer maximum stability and are ideal for underfloor heating.

Highest quality

We control and take responsibility for the entire supply chain: from wood selection, delivery to our factory, timber preparation, kiln drying, manufacturing and offer a warranty for 5 years.

Oak stairs

The staircase is a focal point of every home decor. A well selected, high quality oak staircase will add a touch of class to your interior and will increase the value of your home.

Designed to suit your individual needs

We design and manufacture oak stairs according to individual needs. Wide range of colors and manufacturing technologies allow us to produce oak stairs which are convenient, stylish and ideally suited to your interior.

State-of-the-art production

Robotized CNC machines ensure precision and allow us to create a wide range of designs. Performing precision cutting and machining of stair treads, stair frames and decor elements according to computerised drawings.

Highest quality

We control and take responsibility for the entire supply chain: from wood selection, delivery to our factory, timber preparation, kiln drying, timber grading, manufacturing and quality control.

Construction

Steps on Concrete Staircase,
Full Wooden Construction Staircase,
Steps on Metal Staircase.

Variety of options

Steps

Newels

Balusters

Handrails

Oak treads

Oak treads are prefinished in naturally drying oil or varnished. The range of colours allows matching with flooring, doors, skirtings or overall interior style. Various surface prefinishing techniques used.

Type DA4

Glued oak panel (finger-jointed).
Block width 40 mm.

Type DA7

Glued oak panel (finger-jointed).
Block width 70 mm.

Type MI

Engineered oak panel.
3,5 mm solid oak lamella
on the top and bottom.
Finger-jointed oak blocks inside.

Type MK Rustic

Full stave solid oak panel.
Rustic oak grade.

Oak panels and worktops

Oak panels and worktops are produced gluing together high quality finger-jointed solid oak blocks. Oak wood is hard, durable and perfect for European climate. You can make various joinery products out of Ecowood glued oak panels that are suitable for different purposes.

Produced to suit individual needs

We manufacture various glued oak panels and worktops suitable to your individual needs and fit to very different purposes. Our manufacturing technologies allow us to produce maximum stability oak panels convenient for further production.

Slowest-drying modes

Wood drying is an important preparatory stage in wood processing which determines the durability of the end product. We do use the best kiln drying technologies working under slowest drying modes and ensure continuous temperature and humidity control.

Highest quality

We control and take responsibility for the entire supply chain: from wood selection, delivery to our factory, timber preparation, kiln drying, timber grading, manufacturing and quality control.
