

Parquetvinyl
by Lamett

The look of wood, the ease of vinyl.

If you don't plan to go through life walking on tiptoe, you will know that almost every day has its little mishaps. And that's just as well. And your floor? That needs to look great, but must also be able to take a few knocks! Spills, dancing, jumping... Parquetvinyl can handle both life's little mishaps and its big parties. If your wish-list also includes 'easy to install', then it's a done deal! After all, Parquetvinyl combines all the advantages of wood flooring and easy-maintenance vinyl. Do you want to lay the floor throughout your home? That's no problem: you are certain to find a perfect match in our collections for everywhere from the smallest room to the attic. Find out more about Parquetvinyl in this brochure!

Water-resistant Parquetvinyl

For lots of fun (and little drama)

It's always a joy to see your favourite little rascals having fun. They know how to capture your heart with their crazy ideas. They always have a project. When you see that twinkle in their eyes, you can't help but having fun along with them. In their universe, every day is an adventure in which fish can talk, your interior becomes an obstacle course and the floor is lava — or no, wait — a water slide! You smile and think 'luckily my Parquetvinyl is waterproof too!'

Parquetvinyl, please!

Parquetvinyl is the latest generation of vinyl that has very little in common with the old types of vinyl such as vinyl on rolls. In essence, it's a rigid carrier based on limestone, combined with an innovative top layer that faithfully reproduces the imperfections of wood and/or stone. So we're talking about a sturdy plank or tile. Thanks to the ingenious structure, you can hardly tell the difference between Parquetvinyl and real wood flooring or a ceramic tile.

Better than the real thing.

- 1 Matt PU top layer
- 2 Transparent hard covering
- 3 High resolution decor film
- 4 Ultra-strong, rigid carrier (RCB technology)
- 5 Integrated subfloor

Sublime feel of wood

Our leading collections have a **synchro-nous wood structure** (embossed in register (EIR)). In this way, the structure matches the knots and the grain in the drawing of the wood.

The easiest click system on the market

The floor is finished with a **Tight Lock click system** that provides for fast and easy installation and seams guaranteed to be watertight.

Integrated underlay

All our collections have a noise-reducing sub-floor integrated into the plank or tile. That only has advantages. For example, you can be sure that any **small irregularities are neutralised**, you can lay the floor **far more quickly**, the **sound is muted** and of course **you don't need to purchase an extra sub-floor**.

Suitable for underfloor heating and cooling

Did we already mention that Parquetvinyl can be combined with most **underfloor heating and cooling systems**? Naturally, there are some conditions, but it is certainly possible, with an excellent yield.

Thanks to the extremely realistic decors, even real experts are never sure whether it's a wooden floor or not. Our designers work on the decors until they're true to life, down to the last detail. Added to that, they keep the number of different boards as high as possible to give the floor a natural look and avoid repetition. The surface texture is surprisingly real: you can see and feel wood or stone. And we go quite far to achieve that effect. Some collections have a synchronous wood structure. So if you see a knot or a wood grain, you can feel it too at exactly the same place.

Choose cleanliness and convenience.

Suitable for all areas

Parquetvinyl is suitable for every space: from the toilet to the attic and from the bathroom to the kitchen or bedroom. With Parquetvinyl, it is perfectly possible to have the same floor in the living room and the kitchen. It will look beautiful and be **easy to maintain**.

These floors are also suitable for **commercial applications**. A trendy pop-up store, a coffee bar, a restaurant, a library... many have already opted for Parquetvinyl.

Easy to lay yourself

Laying a Parquetvinyl floor yourself is not difficult. What's more, you only need **simple tools**. A pair of extra hands is helpful for working quickly (and for sharing a toast to the great result!), but is not essential.

You will find **detailed instructions** in the packaging which will guide you through the process. If you prefer to watch a **video**, our YouTube channel will help you. We show you how to do it **step by step** and give **useful tips**.

Scan this code and watch the video if you would like to know how to lay it yourself!

Easy maintenance

You need to be able to **live life to the full** on your floor. Dancing, jumping, cooking, craftwork ... enjoy it all! Make every day a celebration! Even if things get a little out of hand, **a quick mop** will remove every trace. **Easy peasy!** And in that way, you save time for the things you really enjoy.

Maintenance-friendly Parquetvinyl

For lots of fun (and little drama)

Your little rascals never stop growing and neither does the mischief they cause. Sometimes you're just not sure if you should make them stop or make them have even more fun. Secretly, you are proud, because that's just how you used to be. The apple never falls far from the tree. And flying croquettes always land on the floor. Yes, there are still certainties ... and if unforeseen accidents still happen, it's no big deal, because your Parquetvinyl is also surprisingly easy to maintain.

Save time for the things that really matter.

Unfortunately, we can't yet offer a self-cleaning floor, but with **Easy Peasy Floor Care**, cleaning Parquetvinyl is... easy peasy! Add a dose to your mopping water and get maximum enjoyment of your floor back.

Order Easy Peasy Floor Care via parquetvinyl.com

Maintaining Parquetvinyl is easy peasy

As with every floor, you should sweep or vacuum every day to remove pebbles and dirt that **can cause scratches**. Other than that, **regular mopping** keeps the floor in perfect condition. And you can mop to your heart's content because the floor is **water-resistant**.

We care ♡

Concerned about your health and the environment? So are we! Parquetvinyl contains **no phthalates** and emits **no chemical substances** (volatile organic compounds). Moreover, thanks to its unique composition, the floor can be completely recycled. That means that it's **100% safe and healthy** for people, animals and nature.

Favourite floor of pets and their owners

A trail of dirty paw-prints across the room, **a cat** that gets overexcited and knocks over a flowerpot or **your puppy** that welcomes you in a pile of feathers (where's that cushion gone?) ... With Parquetvinyl you can laugh about all of these things. After all, your floor is **clean again in a jiffy**. By the way, did you know that, with its **A+ label**, Parquetvinyl is ideal for **people with allergies**?

Suitable for every room.

Bedroom

With Parquetvinyl, you always get out of bed on the right side. This floor gives you comfort and warmth. Do you need to catch your breath a moment with a few yoga or meditation exercises? That's even more enjoyable on a Parquetvinyl floor.

Bathroom

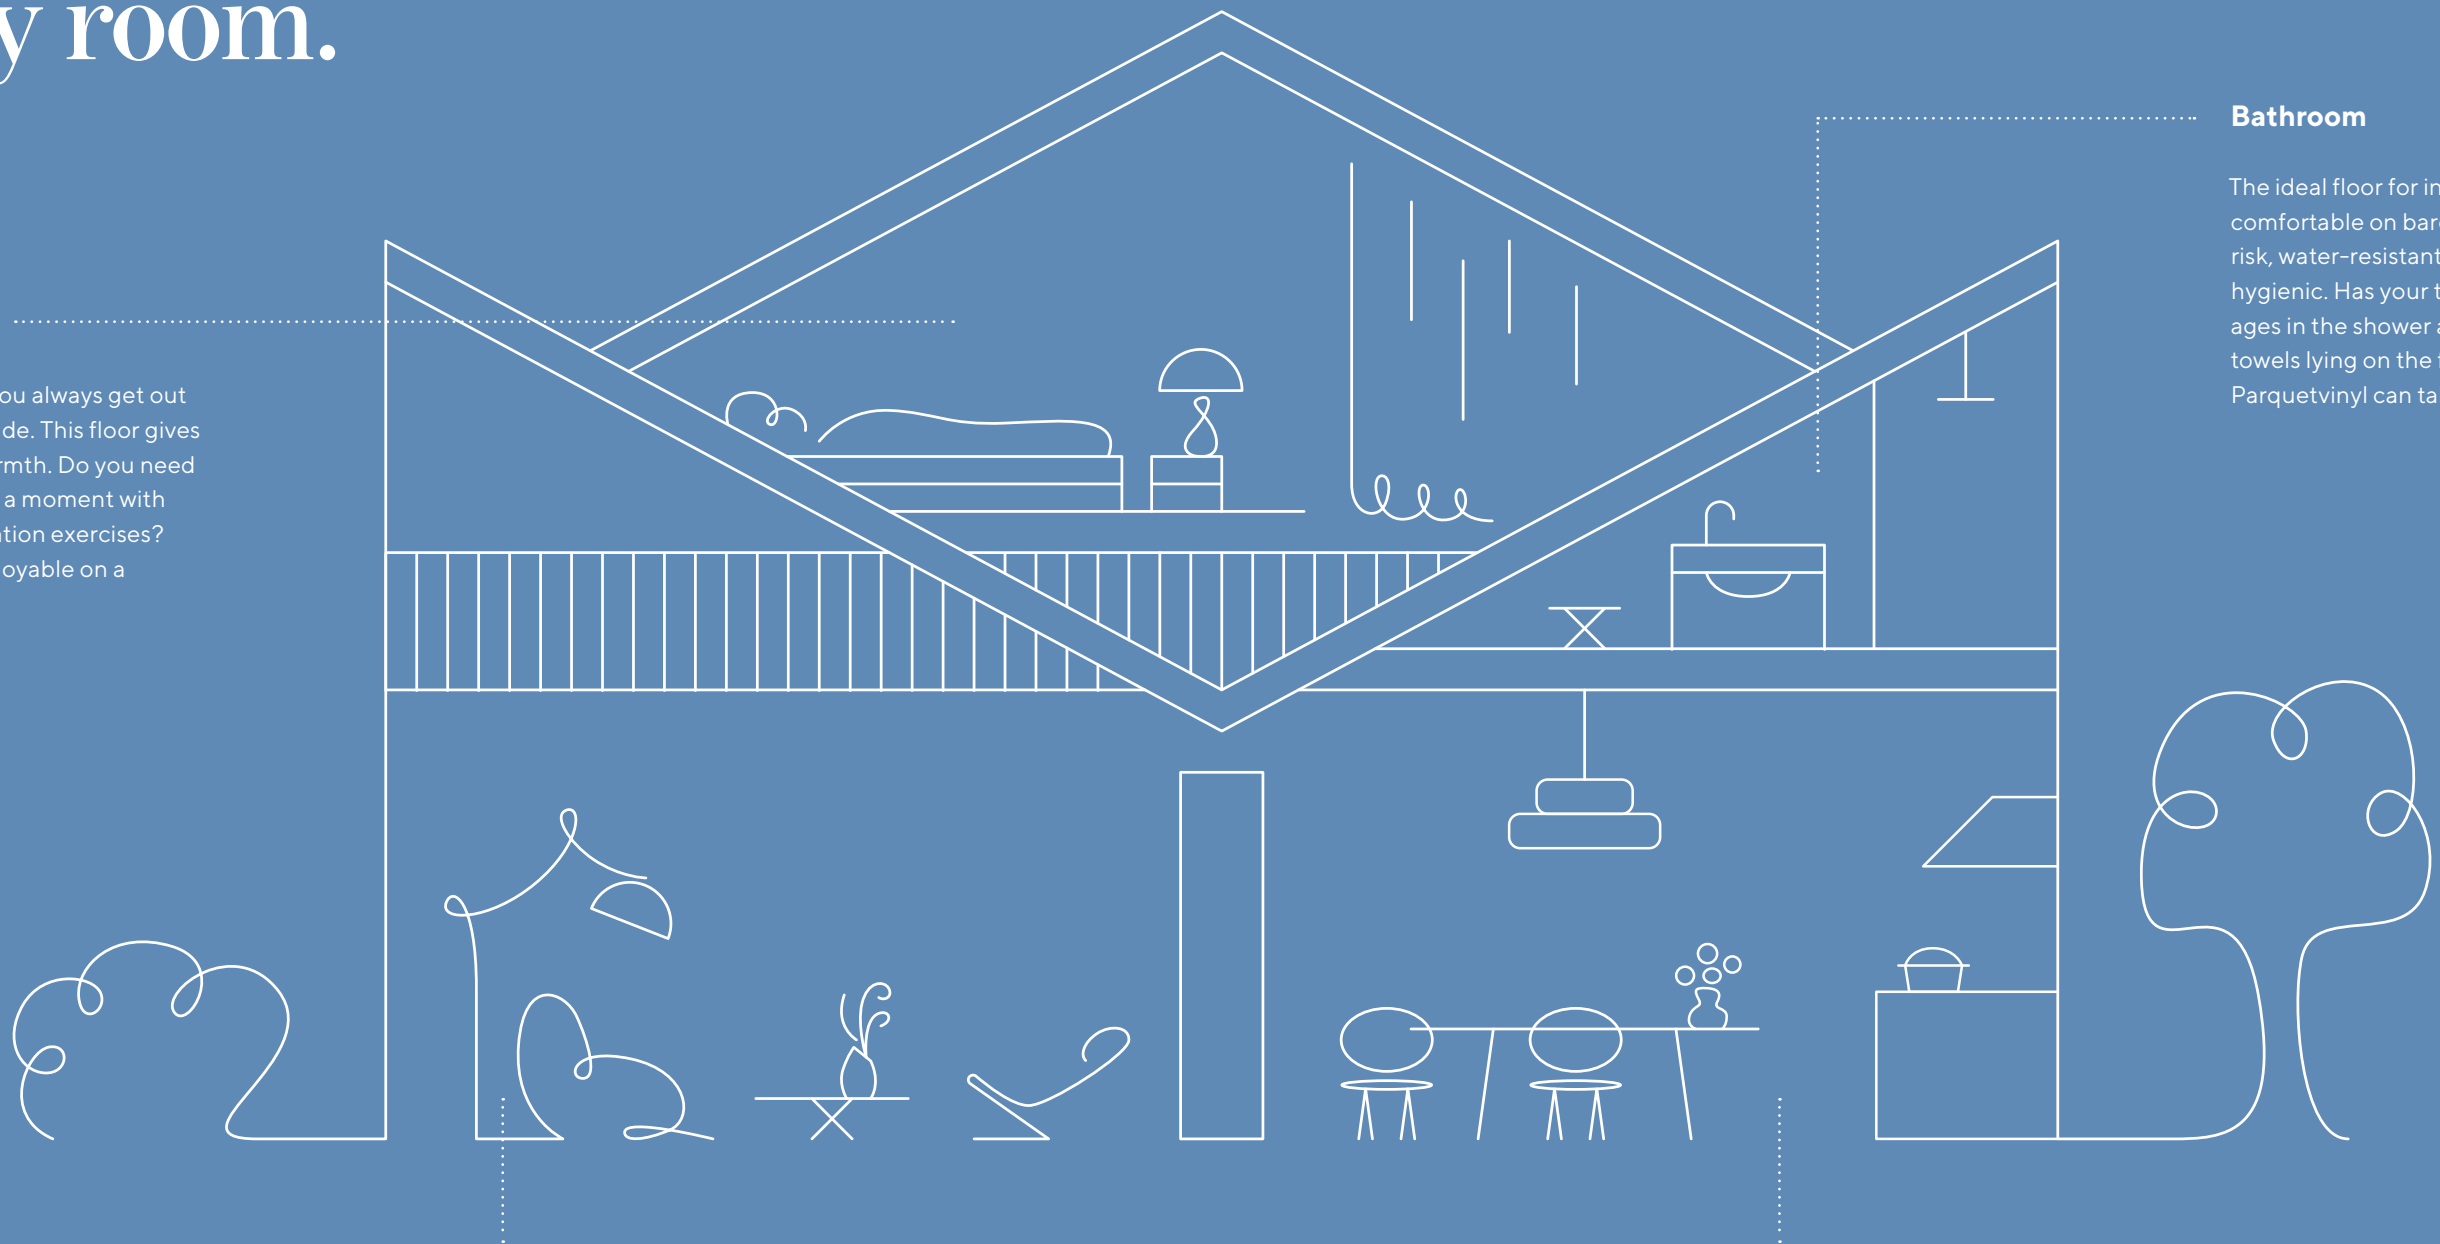

The ideal floor for in your bathroom: comfortable on bare feet, no slipping risk, water-resistant and completely hygienic. Has your teenage son spent ages in the shower and left the wet towels lying on the floor? No problem: Parquetvinyl can take it.

Living room

A floor that is almost impossible to tell from real parquet, and that can be laid right into the kitchen. It exists! Choose the collection that best suits your home and style and enjoy the stunning effect every day.

Kitchen

In the kitchen, you need a floor that can take a few knocks and is easy to maintain. If that pot of delicious spaghetti sauce slips from your hands and falls onto the floor, that's no problem for Parquetvinyl!

Lay it yourself? Yes, you can!

From fast makeover to real renovation

Breaking up an existing floor is hard work and isn't always easy to do. Not to mention the extra costs. One of the great advantages of Parquetvinyl is that it can be **laid on top of most existing floors**, provided that these are flat and strong. Its **limited thickness** makes it truly unique in this way.

Anybody can lay Parquetvinyl.

You don't need to be an expert to do it. Even the herringbone pattern can be laid by a well-prepared handyman or woman. The secret is to have a **flat undersurface**. Once you have that, your floor will be laid in no time and you can soon toast the result. No expensive professional tools required!

Parquetvinyl doesn't need to be acclimatised after purchase

Parquetvinyl is highly resistant to **temperature fluctuations**, so you can start laying the floor straight away unless the temperatures are really extreme. The packaging includes **simple laying instructions**. Just read the instructions and start 'clicking'. Not yet convinced? **Scan the QR code and watch our installation video.**

Parquetvinyl should be installed as a **floating floor**. So easily removing it afterwards is certainly an option. An attractive idea for a **student room** or a **rented property**!

Scan this code and watch the video if you would like to know how to lay it yourself!

Finished down to the last detail.

5 reasons why Parquetvinyl is ideal for your renovation

- 1 Ultra-strong, despite the limited thickness (5 to 7.5 mm)
- 2 Can be laid on top of most existing floors
- 3 Easy laying, without dust or noise and with basic tools
- 4 Easy to click together, with no need for adhesives
- 5 Neutralises irregularities up to 5 mm

Renovation: when old becomes more beautiful than new.

Anyone contemplating a renovation immediately worries about breaking up fixtures, dust in every corner, shortening doors, hidden problems emerging, unforeseen costs... With Parquetvinyl, the picture is a whole lot brighter: **removing the existing floor is usually unnecessary** and noise and dust are kept to a minimum because there is **no need to saw**. What a relief!

Skirting and profiles

You can opt for **skirting boards** with the same look as your floor or for skirting boards painted in the same colour as your wall. A matter of personal taste. Parquetvinyl can be laid in a single section of up to 400 m² or 20 metres long or wide *.

If you nevertheless need a **profile**, we have them in stock in the same look as your floor or in sleek metal. Sometimes, placing a skirting board is not attractive or is simply impossible. An **elegant end profile** then creates a seamless connection to a stairway, kitchen island or window.

Stairs

We also have **slim profiles** for steps and stairs, so that you can lay Parquetvinyl on them to create **one continuous floor**.

Barely visible profiles for a perfect finish.

* subject to certain conditions

Resilient Parquetvinyl

For lots of fun (and little drama)

You are always more than happy to have the real life and souls of the party in your home. Because as you know, there's always something going on when they're around. They are the ones who make the housewarming unforgettable. Together, you create unforgettable memories that will still have you all laughing together five years from now. Luckily, Parquetvinyl can take a beating! That's great, isn't it?

Discover the collections.

Parquetvinyl not only gives you the convenience of vinyl, but also the beauty of natural materials: it looks just like real parquet or stone. And that's a good thing, for your floor plays a big role in the atmosphere of your home. This is why it is not simply vinyl with a print. It is a carefully considered product with strong technical properties and a stunning look. Whichever collection you choose, you can also lay it in every type of space without problems. Be inspired!

Restful and stylish, that's the essence of Yukon. The soft, natural colours are combined with a slightly rustic wood structure with just a few knots. But this floor is never boring. With its deep, realistic wood texture and exceptionally high number of different boards, you almost forget that it isn't a real wooden floor. Like all Parquetvinyl floors, this floor includes an integrated subfloor that assures easy installation and extra acoustic comfort.

A floor with a herringbone pattern is chic and elegant; a classic look that's back in fashion and here to stay. A herringbone floor is a seamless match of contemporary design and classical architecture. Do you also want that typical avant-garde atmosphere in your interior? Well now you can have it without spending a fortune. Both collections have a restful look that emphasises the grandeur of a herringbone floor.

Mantaro

Large tiles for a grand effect!

A marble look is beautiful and gives a sense of luxury. It not only suits classical interiors but looks just as good in a more robust and industrial-style home. The extra-large tiles (1.2 m wide!) emphasise the grandeur of marble still more. Chic and robust.

Parquetvinyl: more than just a floor.
