

FLOOR DESIGNERS

The strong, silent type

New: Medium Tiles Soft tranquillity and other top trends

Carefree living starts in a home with high-performance floors. From mud trails after a refreshing walk with the dog, or wine stains after an epic party with friends: your Alpha Vinyl floor is made to withstand the impact of life. Go for the authentic look of wood and natural stone, and add beauty and ease to your life with stylish, high-performance floors. With an exceptionally strong core and top layer, you'll always enjoy great stain, scratch and impact resistance.

Perfectly suited to your renovation

Redesigning a house or apartment? Placing an Alpha Vinyl floor on an existing surface is easy as pie, whether it's perfectly flat or fairly irregular. Take your pick of a wide range of colours and styles and unleash your creativity.

Observe true craftsmanship

P. 16

Find out how we develop vinyl that looks natural and beautiful by working with artisans who create original designs by hand.

Make a splash!

P. 20

Alpha Vinyl is a 100% waterproof floor with a watertight click system. We'll guide you through all the steps for the perfect watertight finish of your floor.

What's trending?

P. 48

Bring peace and tranquillity back to your home with three trends that inspired our Alpha Vinyl collection. Create an ambiance of serenity in your house using soft colours, nature elements or darker wabi-sabi themes.

Let down your guard

At home, you want to be yourself. That includes the freedom of a clumsy moment once in a while. No need to stress: with Alpha Vinyl's ultra-strong core and unique top layer, your floor is protected against scratches and stains. Even falling objects won't leave indentations on the floor.

The strong, silent type

ALPHA VINYL: RIGID HIGH-PERFORMANCE FLOORS

When you're living life to the fullest, you want a floor that can take a beating. With the Scratch & Stain Guard technology, spilled wine or toy cars won't leave marks on your floor. Your Alpha Vinyl floor has a strong core too, so falling objects won't leave traces.

Start designing your dream rooms with a floor that looks natural and feels soft. It's even watertight and sound absorbing. Ready for some zen?

TILES

AVST40232

The colour and design of the planks continue throughout the bevel, for a perfectly unified floor.

Renovating just got easier

Not exactly a DIYer? No worries. Installing Alpha Vinyl is a piece of cake thanks to its patented Uniclic system. Generally, it's simply click and go! Because of the strength of Alpha Vinyl, in most cases you don't need to prepare your subfloor. They are ready to be installed in any home. Because of this, they are a great choice for renovation projects.

Pushing the limits to create enduring beauty

We want your Alpha Vinyl to look natural and beautiful. Creating a vinyl board with a nice structure is challenging, but we've managed to create a perfectly brushed surface and natural bevel based on quality originals that we carefully selected. The search for the perfect original is of the utmost importance!

THE ALPHA VINYL STORY

In addition to planks, we know you also like beautiful tile floors. Material wise, you can choose from a lot of variations based on a concrete look in a wide range of colours. To design that perfect concrete look for our tiles, we teamed up with craftsmen from countries all over the world, such as Italy. The Coral rock tile is a perfect example of their work: it's a beautiful-looking soft concrete design based on handmade originals in fresh beige & pink.

Large tiles and concrete surfaces are trending in rooms that can get wet, like the bathroom and the kitchen. That's why Alpha Vinyl is 100% watertight across the entire installed floor. Get ready for carefree living.

Liquids allowed

In a home filled with life, there's bound to be a few accidents – from wet shoes in the entrance hall and spilled coffee to kids having a bit too much fun with water in your bathroom. That's why Alpha Vinyl has a watertight click system. No water seeping through the joints, no mould resulting from spilled water.

Truly watertight

Spilled some water? Don't dread raised edges or swelling flooring planks. The 100%-synthetic materials of Alpha Vinyl withstand all liquids. On top of that, the watertight Hydroseal technology, in combination with the Uniclic system, fully closes the joints, making the floor surface entirely watertight and prevents dirt and bacteria from settling.

Get ready to make your dreams a reality in your favourite rooms – even in challenging areas such as the bathroom, kitchen, and entrance hall!

Easy to clean

Give your floor a brand-new look with Quick-Step Cleaning product. Some regular cleaning is enough to preserve their original appearance for years to come

3.

The perfect finish

Add some style with skirtings and profiles that match the colour of your floor. Or, finish up with paintable skirtings.

4.

Worry-free maintenance

Get the best out of your vinyl floors with Quick-Step cleaning products. They ensure that every surface is thoroughly cleaned, resulting in floors that look brand new for years to come.

BROWSE THROUGH OUR ACCESSORIES ON P. 92

Add nature to your interior

We know you love the look of wood and tiles. That's why Alpha Vinyl decors look just as natural as the real thing. Thanks to a unique bevel technique, the beautiful design of Alpha Vinyl runs all the way into the joints. In combination with the extra matt top layer with surface structure, Alpha Vinyl looks as natural as can be.

SMALL PLANKS — AVSP40038

Your floor in one, two, three

You don't have to be a jack of all trades to install Alpha Vinyl. In most cases, it's just click and go with zero preparation required, thanks to its patented Uniclic system.

Did you know that you can install our vinyl on any surface? Because of the strength of Alpha Vinyl, in most cases you don't need to prepare your subfloor. They are ready to be installed in any home. If you're renovating, these thin planks will simplify your flooring plans.

Creating your perfect kitchen

Quick-Step floors are perfectly suited for renovation projects like this kitchen. In most cases, it's not even necessary to remove an existing tiled floor. Easy peasy.

MEDIUM PLANKS — AVMP40236

Level up with Alpha Vinyl for stairs

Thinking of giving your stairs a makeover too? Our Alpha Vinyl is ideal for staircases. With our durable vinyl tread cover, you'll have it done in no time. When it comes to cleaning, simply use our regular maintenance products.

Go for the perfect finish with Stair Covers

Creating an elegant staircase that matches the rest of your interior is straightforward with our Vinyl Stair Covers. You can match them with the design of your floor, and they are scratch and wear resistant, waterproof, easy to clean and easily installed. It's without a doubt the most efficient way to renovate. Stair Covers are available in Medium Planks and Small Planks (not for Alpha Vinyl tiles).

We all love natural beauty. The only way to continue to enjoy the beautiful things our planet has to offer is to treat it with respect. That's why our flooring products not only look good, but are as hard-wearing and sustainable as possible. Together, we can reduce our ecological footprint, from the production of your flooring to the end of its life.

Clean indoor air

Most of your life takes place indoors, which is why the air quality in your home is so vitally important. Many factors have an effect on it: ventilation, candles, cleaning agents, and even the materials used in your interior, such as the flooring. That is why we minimise our emissions of harmful substances and have reduced them to **50 times lower than the European standard**. What's more, you don't

need any aggressive cleaning products to keep your vinyl flooring clean. All you need is lukewarm water and, if necessary, some Quick-Step Cleaning product.

The following labels demonstrate that your flooring complies with the strictest environmental and health standards:

The highest guarantee for the air quality in your home.

International building classification programme for lowemission products.

The proof that our flooring products do not release toxic substances and are odourless.

This SCS label shows that your flooring meets low-emission product requirements.

Consciously selected materials

We manufacture your vinyl flooring in Belgium, in the heart of Europe. The raw materials come mainly from neighbouring countries. Vinyl flooring can contain up to 40% **chalk**, a material that is and will remain available in abundance. Another quarter of our vinyl is made from **recycled PVC** from our own production waste. Only one quarter is made from what is known as 'virgin' or new **PVC**. The remaining ingredients – primarily additives – do not contain any harmful substances. The plasticizers we use to make your flooring flexible are the same as those used in children's toys and food packaging and are, therefore, 100% ortho-phthalate-free.

Green production

We take every opportunity to make our production processes greener. For this reason, we joined the **European Energy Efficiency Programme**, which aims to implement as many energy-saving measures as possible and monitors all efforts from day to day. Furthermore, 70% of the heat we use in our production unit is generated from wood residues and dust from our nearby lamination site. This helps us to save 25,000 tonnes of fossil CO2 emissions per year.

Circular ecosystem

We recycle 99% of our own industrial waste through our internal production process. This means we do not burn or dump materials unnecessarily, and we create our own circular ecosystem.

Do you want to find out more about the sustainability of our flooring products?

Read all about it on quickstep.com

On top of the trends

SOFT TRANQUILLITY

AUTHENTIC NATURE

DARK WABI-SABI

You're all about style. We get that. That's why we continuously add new floors to our collection, following the latest trends in colours and patterns for our designs. For our Alpha Vinyl collection, we took inspiration from three trends that bring peace and tranquillity back to your home.

Soft tranquillity

Home. It's where you take a break, unwind, and retreat from the hectic outside world. Creating a harmonious setting to come home to isn't difficult at all. Light, neutral colours and tactile, hand-made materials are great ways to achieve tranquillity. A combination of soft textures and colours allows you to recharge and face the next day with renewed energy.

Soft tranquillity also concerns the minimalism found in Japandi, a stylish trend combining Japanese and Scandinavian interior design. Natural materials such as light oak with little knots and subtle colour contrast inspire the calm of nature. A beautiful example is our Botanical beige oak. Quiet, light neutrals like whites, simple but stylish light greys and natural elements combine well. Or try our Small Planks in light colours and go for that premium touch.

The only rule? Embrace simple, but avoid boring. Don't hesitate to go for a detailed but soft brushed surface. Alternatively, pick a warmer, sandy tone with a touch of pink, like the tones featured in our Coral rock tile.

MEDIUM PLANKS — AVMP40079

Authentic nature

Long walks in the forest, gardening, staycations at home among the local flora and fauna... Connecting with nature has never been more important than it is today. Bring some of that natural harmony into your home by incorporating brown tones in your interior. Where black invites contrast, brown supports other colours and helps them shine. Adding touches of green and brown, like our Autumn oak chocolate or Cinnamon rock floors, will create a cosy yet luxurious atmosphere in your home.

Surrounding yourself with nature also means accepting the beauty of imperfection. No lines in nature are straight, and every tiny element is unique. You can find a lot of that authenticity in our floors – take, for example, the small splits, cracks and beautiful knots of our Botanical smoked oak. Ready to fill your cocoon with natural elements?

Dark wabi-sabi

The ancient Japanese aesthetic movement of wabi-sabi teaches us to see beauty in imperfection. Wabi-sabi revolves around asymmetry, geometric forms, robust unfinished materials and sleek shapes: a unique combination for any interior. Colourwise, upgrade your favourite rooms with earthy tones and vibrant greens. Another important facet of this movement is the focus on objects that add character or tell a story. Finally, rough materials like concrete, stone and wood can really make your rooms stand out.

Combining wabi-sabi and darker colours turns your home into a warm, luxurious place. Rough concrete surfaces, such as our Volcanic rock tile, add a touch of imperfection, inspiring balance, peace and tranquillity. Black and dark blue add a touch of mystery and exclusiveness. Not ready to go completely dark? Easily contrast dark elements with white or lighter-coloured surfaces and objects.

Tools to help you choose

FloorExplorer

With so many flooring options to choose from, making the right decision can be a challenge. Let our FloorExplorer guide you through a selection of floors that match your personal needs and style in just a few steps. Give it a try!

Your skirtings are protected against the daily wear and tear.

QUICK-STEP WARRANTY

Skirtings come with the same warranty as your floor.

CHECK OUT ALL SKIRTINGS AND PROFILES ON P. 93

Paintable skirtings

Grab a can and paint your skirtings in a colour that suits your style, or simply leave them white. Do your skirtings need to withstand damp conditions, or do you want to be able to clean them with water? Make sure to choose waterproof skirtings.

In which direction should

Guided by the light

The direction of your floor has a huge impact on a room's overall appearance and can be a tough nut to crack. As a general rule, lay your floor in the same direction as the main light source in a room and in the same line as the most frequently used entrance. If there are several doors and windows, then opt for the direction that's the easiest to install.

In narrow rooms

Installing your floor in a narrow room? Why not lay it horizontally! Planks laid width wise will make the surface appear wider, avoiding a boxed-in effect. To enhance this even further, avoid dark colours for your floor or walls, as these will make a narrow room look even narrower.

I install my floor?

In short rooms

If you're laying your floor in a short room, you'll want to add a sense of depth. Make the room look longer by installing your floor lengthwise. Want to increase the effect of lengthwise installation? Make sure to combine a light-coloured floor with darker walls: this will add even more depth to your room.

WORRY-FREE DIY INSTALLATION

Did you find your dream floor? The Quick-Step Uniclic system ensures a quick and easy installation, even in tight corners and under radiators. On top of that, all Quick-Step Alpha Vinyl floors can be installed over traditional underfloor heating, and even on stairs!

You can find all the accessories required to install and finish your floor at Quick-Step.

Check out our installation tips and videos at quickstep.com

We've got the answers to all your questions

Why do I have to use an underlay?

Besides creating a level base for the installation of your new floor, an underlay also provides excellent acoustic insulation and reduces creaking noises. On top of that, the underlays are compatible with traditional underfloor heating and cooling, which you might opt for. Be sure to read the underfloor heating instructions before installation.

Do I really need expansion joints?

It's important to have expansion joints of 8 mm along all walls, around radiator pipes, etc. This way, the floor has enough space to contract and expand in case of shifts in temperature.

Expansion joints can be added under doors between rooms to separate them. Check our installation instructions to avoid tension and possible distortion of the floor.

Can I use Quick-Step Alpha Vinyl in combination with underfloor heating or cooling?

Alpha Vinyl flooring and underfloor heating are a good match. That's why it's extremely popular for both renovations and new buildings. All Quick-Step Alpha Vinyl floors can be combined with low-temperature underfloor heating or cooling.

If you plan to install underfloor heating or cooling, then our Heat underlay is an excellent choice.

How should I clean and maintain my Alpha Vinyl floor?

A floor gets dirty, there's no way around it. Luckily, Quick-Step floors are easy to maintain. With these tips, you'll be able to clean your floor in no time. All you'll need is your vacuum cleaner, the Quick-Step Cleaning kit, a bucket and Quick-Step Cleaning product.

Vacuum your floor thoroughly or mop to make sure you got all the dust.

Fill the bottle of your Quick-Step Cleaning kit with a small

amount of Quick-Step Cleaning product and water. Fill a bucket with clean water for rinsing out your mop.

Pull the lever to moisten your floor and start to mop. Rinse your mop in the bucket containing clean water and wring it out well. Then wipe your floor again until it sparkles. It will be clean before you know it.

PRO TIP:

3

Mop in the direction of your planks or tiles to avoid drying streaks.

PRO TIP-

Alpha Vinyl can also be cleaned with a steam cleaner.

HAS A MAJOR IMPACT ON THE FINAL LOOK, QUALITY AND ACOUSTICS OF YOUR FLOOR

When laying an Alpha Vinyl floor, choosing the right underlay is crucial. It's recommended in order to create a level base for the installation of your new floor. Furthermore, it provides much-needed acoustic and thermal insulation. Don't hesitate to combine your underlay with traditional underfloor heating. You can find installation instructions at quickstep.com.

ACCESSORIES

INSTALLATION

UNDERLAYS

If you're going for a quick and smooth floating installation, choosing the right underlay is essential. Besides creating a **level base** - to support the Uniclic system - it also provides **excellent acoustic insulation**. On top of that, our underlays are compatible with traditional **underfloor heating and cooling**.

Comfort
QSVUDLCOMFORT15

Thickness: 1.15 mm - Roll: 15 m²

This all-round underlay helps you level the existing subfloor. Comfort suits any room and is a sustainable choice because it's made of recycled PET flakes.

Suitable with underfloor heating and cooling.

Heat QSVUDLHEAT10

Thickness: 1.55 mm - Roll: 10 m²

The recommended underlay for rooms that get a lot of direct sunlight and rooms with underfloor heating or cooling. Heat also offers optimal in-room noise reduction.

Transit
QSVUDLTRANSIT15

Thickness: 1.20 mm - Roll: 15 m²

Offering the best noise reduction toward neighbouring rooms, this underlay is ideal for first floors and apartments. Transit is a sustainable choice because it's mainly made of recycled PET flakes. Suitable with underfloor heating and cooling.

INSTALLATION TOOLS

Installation set QSTOOLA

Set with a tapping block to easily click planks together, a cramp iron for hard-to-reach places and spacers to provide perfect expansion joints (8 mm) between walls and floor.

FINISHING

COLOUR-MATCHED SKIRTINGS

QUICK-STEP WARRANTY
Skirtings come with the same warranty as your floor.

Scotia QSVSCOT(-) 2400 x 17 x 17 mm A discrete finish that matches the colour of your floor. Easy to install with One4All Glue. Use the Foamstrip and Hydrokit to obtain a watertight finish.

Also available in a white, paintable version (QSSCOTPAINT).

Standard skirting QSVSK(-) 2400 x 12 x 58 mm

Standard skirtings that match the colour of your floor and are adjustable in height (40 or 58 mm). Use the included plugs to connect skirtings, even in corners. Paintable waterproof flexible skirting **QSFLEXSKR**

14 x 40 mm

Flexible, paintable skirting made of foamed PVC that can be cut to your desired length. Ideal to finish pillars or curved walls. Use the Foamstrip and Hydrokit for a watertight finish in damp rooms. Easy to install with contact glue.

INSTALLATION TOOLS FOR SKIRTINGS

One4All Glue QSGLUE290 290 ml

Multi-purpose glue that ensures adhesion on all materials and substrates.

Average usage: 1 tube for 15 m of skirtings.

Plugs NEPLUG Connection pieces for standard skirting and parquet skirting. One package contains 24 connections for inside and outside corners + 24 connections for straight stretches.

COLOUR-MATCHED PROFILES

Incizo profile QSVINCP(-) 2000 x 45 x 8 mm Multifunctional finishing tool to finish your floor and stairs in matching colours. Simply cut the Incizo basic profile to the desired shape with the supplied Incizo knife. Use the Foamstrip and Hydrokit for a watertight finish. Patent pending.

Contains 1 Incizo profile, 1 Incizo knife and 1 plastic rail.

APPLICATION 1

 ${\tt Connect\ two\ floors\ of\ different\ heights.}$

APPLICATION 2

Connect two floors of the same height.

APPLICATION 3

Finish your floor along walls or windows. Cut in half to cover twice the distance with one profile.

APPLICATION 4

Create a nice transition between your Alpha Vinyl floor and other flooring types or finish along sliding windows.

The Incizo profile also allows you to finish your stairs and steps in the flooring design of your choice. For this application, you need the Incizo profile and an aluminium subprofile. Subprofile to be ordered separately.

APPLICATION 5
Finish your stairs and steps.

ALUMINIUM FINISHING PROFILES

STAIR COVERS

Vinyl Stair Cover - Bullnose QSVSTRBMP(-) 1474 x 136 x 54 mm QSVSTRBSP(-) 1231 x 116 x 54 mm

Durable vinyl tread cover with a bullnose stair nosing to cleanly finish your stairs. Since Stair Covers are made out of your floor's material, the colour matches 100%. Easy glued-down installation.

Only available for Alpha Vinyl Medium and Small planks.

FINISHING TOOLS

Coloured kit QSKIT(-) 310 ml

Pipe covers
QSRCINOX15 / QSRCINOX22
2 pcs/pack

This elastic, acrylic-based paste is the ideal solution to fill joints between skirtings and walls. Also ideal for all Quick-Step joints that can't be finished with skirtings, profiles or pipe covers. Available in matching colours.

Average usage: 1 tube for 15 m angle joints.

Stainless steel covers to nicely finish pipes and heating elements. Available in inside diameter sizes 15 and 22 mm. Do not glue the covers to the floor, but install them floating.

TOOLS FOR A WATERTIGHT FINISH

Give your floor a watertight finish using our Foamstrip and Hydrokit to get your water-resistance warranty.

Follow the installation instructions and consult the warranty conditions for more details. Get inspired on page 26.

Foamstrip NEVRFOAMSTRIP15 15 m x 8 mm x 5 mm

Fill up expansion joints with the Foamstrip and combine with the Hydrokit for a watertight finish of your floor. Invisible installation under skirtings, profiles etc.

Hydrokit QSKITTRANSP 310 ml

Transparent silicone to combine with the Foamstrip for a watertight finish of your floor. Invisible installation under skirtings, profiles, etc. Average use: 1 tube for $15\,\mathrm{m}$.

MAINTENANCE

Cleaning product 2.5 L QSCLEANING2500 2.5 L

Bring nature's beauty inside

Feel like giving your home a nice makeover? With Vinyl Flex, it's a piece of cake. Add character to your rooms with natural patterns and trendy colour palettes. You have a wide range of options to choose from! Create stunning spaces all around the house, with planks or our new and trendy Illume tiles. Complete with that natural feel you're looking for, thanks to the surface structure of the extra matt top layer.

Pushing the limits to create enduring beauty

We know you like a cosy home and the soothing feeling of carpet. With the Illume tiles, you enjoy an ultra-soft, high-performing floor. Trendy, pastel colours combine beautifully with the tactile surface and look of velvet, fabric and other textiles. Plus, unlike carpets and rugs, you can easily maintain our tiles thanks to a wide array of technologies that enhance their performance.

THE STORY BEHIND VINYL FLEX

Inspired by the sea, sand and shells, the Pebble and Oyster concrete tiles were created and designed by the Quick-Step team and our passionate craftsmen. It's made with natural materials like shells and sand, reminiscent of a terrazzo floor with an added touch of uniqueness. A true eyecatcher. You'll love all the detail we put into this floor.

Creating larger and larger tiles is a trend in flooring. But in bringing you your perfect floor, we don't forget to find the right balance between size, design and ease of installation. That's why you can now find vinyl tiles that are luxurious as well as easy to install. Naturally without too many grouts, to emphasize the natural aspects whilst also giving your home a real sense of zen.

Feel the softness, enjoy the beauty

If you're a creative soul, you're going to love the Illume collection. Experiment with different looks (like carpet and concrete) and pick a floor that reflects your personality: from soft and playful to rough and tough.

ILLUME

ILCL40269

Into that carpet look and feel? Vinyl Flex feels nice on your feet and has the look of carpet. It's really the best of both worlds! On top of that, it's easy to clean as well. Choose from a variety of stylish colours from our trendy collection.

ILLUME

ILCL40275

You want your floors to stay looking immaculate. With Vinyl Flex, that's easy. They're made to take everything life throws at them, with a good scratch and stain resistance. Even if you spill some water, it's no hassle: our Vinyl Flex is completely waterproof. Just don't forget to clean up what you've spilled, and your floor will look as good as new for years.

A treat for your feet

From the moment you step out of bed to the moment you kick off your shoes after work: a comfy floor makes life so much more enjoyable. Don't worry about the noise either. This vinyl is sound absorbing. Ideal for homes that are full of life.

Click or glue? It's up to you! All you need is a pair of hands and the Quick-Step Vinyl knife to cut the planks or tiles. At Quick-Step, we provide everything for a perfect installation and finish.

Moreover, with Vinyl Flex, you can install your floor in most cases endlessly without expansion profiles, resulting in a clean, finished

In love with your vinyl? Why not put it on the walls as well! Our Glue+ ranges can be used as wall decoration, for a unique and stylish touch.

Your new floor in one, two, three

A pair of hands and a good knife, that's really all you need to install Vinyl Flex. At Quick-Step, we provide everything you need for an uncomplicated installation and finish. Clicking is easy with our Uniclic (Multifit) systems, while we've also made gluing so effortless that you can cover large surfaces quickly.

Furthermore, in most cases you can install your floor endlessly without expansion profiles, resulting in a clean, finished look.

PULSE — PUCL40079

Take it to the next level, with vinyl for stairs

Did you know that Vinyl Flex is perfectly suited to staircases? It offers great protection from wear and tear, allowing you to move around freely. Use our colour-matched Incizo profiles for our Click/Click+ ranges and aluminium profiles for glued-down floors.

TIP: STYLE YOUR STAIRCASE TO YOUR PERSONAL TASTE WITH OUR WIDE RANGE OF PROFILES. YOU CAN FIND THEM ALL IN OUR ACCESSORIES SECTION ON PAGE 99.

We all love natural beauty. The only way to continue to enjoy the beautiful things our planet has to offer is to treat it with respect. That's why our flooring products not only look good, but are as hard-wearing and sustainable as possible. Together, we can reduce our ecological footprint, from the production of your flooring to the end of its life.

Clean indoor air

Most of your life takes place indoors, which is why the air quality in your home is so vitally important. Many factors have an effect on it: ventilation, candles, cleaning agents, and even the materials used in your interior, such as the flooring. That is why we minimise our emissions of harmful substances and have reduced them to **50 times lower than the European standard**. What's more, you don't

need any aggressive cleaning products to keep your vinyl flooring clean. All you need is lukewarm water and, if necessary, some Quick-Step Cleaning product.

The following labels demonstrate that your flooring complies with the strictest environmental and health standards:

The highest guarantee for the air quality in your home.

International building classification programme for lowemission products.

The proof that our flooring products do not release toxic substances and are odourless.

This SCS label shows that your flooring meets low-emission product requirements.

Consciously selected materials

We manufacture your vinyl flooring in Belgium, in the heart of Europe. The raw materials come mainly from neighbouring countries. Vinyl flooring can contain up to 40% **chalk**, a material that is and will remain available in abundance. Another quarter of our vinyl is made from **recycled PVC** from our own production waste. Only one quarter is made from what is known as 'virgin' or new **PVC**. The remaining ingredients – primarily additives – do not contain any harmful substances. The plasticizers we use to make your flooring flexible are the same as those used in children's toys and food packaging and are, therefore, 100% ortho-phthalate-free.

Green production

We take every opportunity to make our production processes greener. For this reason, we joined the **European Energy Efficiency Programme**, which aims to implement as many energy-saving measures as possible and monitors all efforts from day to day. Furthermore, 70% of the heat we use in our production unit is generated from wood residues and dust from our nearby lamination site. This helps us to save 25,000 tonnes of fossil CO2 emissions per year.

Circular ecosystem

We recycle 99% of our own industrial waste through our internal production process. This means we do not burn or dump materials unnecessarily, and we create our own circular ecosystem.

Do you want to find out more about the sustainability of our flooring products? Read all about it on quickstep.com

On top of the trends

SOFT LUXE

SOFT PLAY

NATURE PLAY

You're all about style. We get that. That's why we constantly add new floors to our collection, following the latest trends in colours and patterns. With Vinyl Flex, it's all about contrast. Whether you're into luxurious minimalism or colour and playfulness, there's something for everyone. Time to discover three trends that will surely influence your stylish interior.

Soft luxe: minimalism is the new luxury

Your home is where you get away from the hustle and bustle of daily life. A place of rest and relaxation. This search for tranquillity is reflected in the Japandi minimalistic interior style and its signature white tones. This is not a cold, stark, boring white: it plays around with tones, textures and gloss levels. Because white can also be warm!

If you want to add even more warmth, choosing beige, powdery and sandy colours are the way to go. Or why not opt for a soft grey, like cast concrete? These create endless combination possibilities and an effortless touch of luxury.

Soft play: happy comfort

If strict minimalism isn't your cup of tea, you could also go in a completely different direction: playfulness! The fun thing about this trend is that there are no rules: combine soft, pastel colours, velvety textures and patterns to bring some positive vibes into your home.

Colours affect your mood and well-being, adding a spark to your day. You can easily counter the serious neutrals, beige and greys of the Soft Luxe mood with pastel colours. How about some pistachio green, mellow yellow, soft pink or light blue to brighten up your place? Play with the strength of your colours and opt for saturated or washedout versions of your favourite shades if you love a softer look. In combination with the velvety softness of our vinyl, you'll add an air of instant cosiness to your interior.

Nature play: perfect imperfections

The wild outdoors calms our mind and soul. So why not bring the outside in? Recycling natural or waste materials is a great way to do that. We're reinventing products by using materials that are given to us by nature, like shells and sand. Not only is this sustainable, but it's also a unique way to grasp that playful creativity also found in the wild.

Surrounding ourselves with nature also means accepting imperfection and embracing authenticity. Elevate natural elements by opting for natural patterns, materials and colours that you can make your own.

SCRATCH-RESISTANT TOP LAYER

Your skirtings are protected against the daily wear and tear.

QUICK-STEP WARRANTY

Skirtings come with the same warranty as your floor.

CHECK OUT ALL SKIRTINGS AND PROFILES ON P. 96

Paintable skirtings

Grab a can and paint your skirtings in a colour that suits your style, or simply leave them white. Do your skirtings need to withstand damp conditions, or do you want to be able to clean them with water? Make sure to choose waterproof skirtings.

In which direction should

Guided by the light

The direction of your floor has a huge impact on a room's overall appearance and can be a tough nut to crack. As a general rule, lay your floor in the same direction as the main light source in a room and in the same line as the most frequently used entrance. If there are several doors and windows, then opt for the direction that's the easiest to install.

In narrow rooms

Installing your floor in a narrow room? Why not lay it horizontally! Planks laid width wise will make the surface appear wider, avoiding a boxed-in effect. To enhance this even further, avoid dark colours for your floor or walls, as these will make a narrow room look even narrower.

I install my floor?

In short rooms

If you're laying your floor in a short room, you'll want to add a sense of depth. Make the room look longer by installing your floor lengthwise. Want to increase the effect of lengthwise installation? Make sure to combine a light-coloured floor with darker walls: this will add even more depth to your room.

WORRY-FREE DIY INSTALLATION

Did you find your dream floor? The Quick-Step Uniclic (Multifit) system ensures a quick and easy installation, even in tight corners and under radiators. You can easily place Vinyl Flex on even or slightly uneven surfaces. On top of that, all Quick-Step Vinyl Flex floors can be installed over traditional underfloor heating, and even on stairs!

You can find all the accessories required to install and finish your floor at Quick-Step.

Check out our installation tips and videos at quickstep.com

We've got the answers to all your questions

Should I go for a floating or glued down Do I really need expansion joints? installation?

FLOATING

If you're dealing with slightly uneven surfaces or old tiles with grouts of no more than 4 mm in width and 1 mm in depth, a floating installation is recommended. You can choose from a selection of underlays specifically designed for Quick-Step Vinyl Flex.

GLUED DOWN

Want to install your vinyl on levelled subfloors and walls? Then go for a glued down installation. Quick-Step Vinyl Glue (a high-quality adhesive) makes the job super easy! Check our website for more information and installation instructions.

Can I use Vinvl Flex in combination with underfloor heating or cooling?

Vinyl Flex flooring and underfloor heating are a good match. That's why it's extremely popular for both renovations and new buildings. All Quick-Step Vinyl floors can be combined with low-temperature underfloor heating or cooling.

If you plan to install underfloor heating or cooling, our Heat underlay is an excellent choice. This underlay is obligatory for rooms that get a lot of direct sunlight (rooms with large windows, for example), where temperatures can rise up to 45°C. If you're going for a glued down installation, an underlay isn't necessary.

Don't forget to check the underfloor heating instructions at quickstep.com.

For glued-down installations, you don't need any expansion joints. For floating (click) installations without underfloor heating, it's important to have expansion joints of min 2 mm and preferably 5 mm along all walls and heavy or fixed furniture. For floating installations with underfloor heating, you'll need expansion joints with a minimum of 5 mm. That way, your floor has enough room to expand and contract due to changes in temperature.

How should I clean and maintain my Vinyl Flex

Cleaning Vinyl Flex is simple. All you'll need is your vacuum cleaner, the Quick-Step Cleaning kit, a bucket and Quick-Step Cleaning product.

Vacuum your floor thoroughly or mop to make sure you get all the dust.

Fill the bottle of your Quick-Step Cleaning kit with a small amount of Quick-Step Cleaning product and water. Fill a bucket with clean water for rinsing out your mop.

Pull the lever to moisten your floor and get mopping. Rinse your mop in the bucket containing clean water and wring it out well. Then wipe your floor again until it sparkles. It will be clean before you know it!

PRO TIP-

Mop in the direction of your planks or tiles to avoid drying streaks.

MORE QUESTIONS?	quickstep.com
-----------------	---------------

HAS A MAJOR IMPACT ON THE FINAL LOOK, QUALITY AND ACOUSTICS OF YOUR FLOOR

When laying a Vinyl Flex floor, choosing the right underlay is crucial. It's necessary to create a level base for the installation of your new floor. Furthermore, it provides acoustic and thermal insulation. Don't hesitate to combine your underlay with traditional underfloor heating and cooling. You can find installation instructions at quickstep.com.

ACCESSORIES

INSTALLATION

UNDERLAYS

If you're going for a quick and smooth floating installation, choosing the right underlay is essential. Besides creating a **level base** - to support the Uniclic system - it also provides **excellent acoustic insulation**. On top of that, our underlays are compatible with traditional **underfloor heating and cooling**.

Comfort QSVUDLCOMFORT15

Thickness: 1.15 mm - RoII: 15 m^2

This all-round underlay helps you level the existing subfloor. Comfort suits any room and is a sustainable choice because it's made of recycled PET flakes. Suitable with underfloor heating and cooling.

Heat QSVUDLHEAT10

Thickness: 1.55 mm - Roll: 10 m²

The recommended underlay for rooms that get a lot of direct sunlight and rooms with underfloor heating or cooling. Make sure to use Heat if the temperature of your floor is 45 $^{\circ}\text{C}$ or higher. Heat also offers optimal in-room noise reduction.

Transit
QSVUDLTRANSIT15

Thickness: 1.20 mm - Roll: 15 m²

Offering the best noise reduction to neighbouring rooms, this underlay is ideal for first floors and apartments. Transit is a sustainable choice because it's mainly made of recycled PET flakes. Suitable with underfloor heating and cooling.

GLUED-DOWN INSTALLATION

If you're going for a glued-down installation, use Quick-Step Vinyl Glue for the best result. Our high-quality, **ready** to use glue spreads easily and guarantees fast adhesion. Our damp-proof Vinyl Glue is compatible with traditional underfloor heating and cooling and can also be used for vertical installation on dry walls.

Vinyl Glue QSVGLUE6A / QSVGLUE15A 6 kg / 15 kg

Resealable aluminium bags packed in cardboard boxes. Average usage: 6 kg for 20 m², 15 kg for 50 m². Read the instructions before you get started. Check if the glue is compatible with your subfloor.

Vinyl Glue trowel (A2) QSVA2

This high-quality trowel ensures a perfect glue distribution and is indispensable for a professional glued-down installation.

INSTALLATION TOOLS

Vinyl installation tool QSVTOOL

Cramp iron to easily cut planks to size and get to hard-to-reach places.

Vinyl knife QSVKNIFEB / NEVKNIFEREFILL40 Incl. 5 blades

Knife for precise and stable cutting, including curves and shapes. A refill pack contains 40 blades.

FINISHING

COLOUR-MATCHED SKIRTINGS

Why choose Quick-Step colour-matched skirtings and profiles?

PERFECTLY MATCHING COLOURS

Our skirtings and profiles flawlessly match the colour of every floor.

SCRATCH-RESISTANT TOP LAYER

Skirtings and profiles are protected against everyday wear and tear.

QUICK-STEP WARRANTY

Skirtings come with the same warranty as your floor.

Scotia QSVSCOT(-) 2400 x 17 x 17 mm

Standard skirting QSVSK(-) 2400 x 12 x 58 mm

Standard skirting that matches the colour of your floor. The included plugs are available separately too (NEPLUG). Easy to install with One4All Glue. Also available in a white, paintable version (QSSKPAINT).

PAINTABLE SKIRTINGS

Paintable scotia QSSCOTPAINT $2400 \times 17 \times 17 \text{ mm}$

Paintable scotia that can be left white as well. Easy to install with One4All Glue. Not suitable for damp rooms - check out our range of waterproof skirtings.

Paintable standard skirting QSSKPAINT $2400 \times 12 \times 58 \text{ mm}$

Paintable skirting that can be left white as well. Use the included plugs to connect skirtings, even in corners. The included plugs are available separately too (NEPLUG). Easy to install with One4All Glue. Not suitable for damp rooms - check out our range of waterproof skirtings.

Paintable parquet skirting QSPSKRPAINT $2400 \times 14 \times 77 \text{ mm}$

Paintable skirting with space to hide cables. Use NEPLUG plugs (not included) to connect skirtings, even in corners. Easy to install with One4All Glue or Track. Not suitable for damp rooms - check out our range of waterproof skirtings.

Paintable cover skirting QSISKRCOVER 2400 x 16 x 129 mm

Paintable ovolo skirting QSISKRWHITE $2400 \times 16 \times 160 \text{ mm}$

Paintable skirting to put over an existing one - ideal for renovations. Adjustable to 4 heights between 68 and 129 mm. Can be left white as well. Easy to install with One4All Glue. Not suitable for damp rooms - check out our range of waterproof skirtings.

Paintable skirting that can be used in two shapes for more decorative freedom. Adjustable to 5 heights between 25 and 134 mm - use the supplied Incizo knife. Can be left white as well. Easy to install with One4All Glue. Not suitable for damp rooms - check out our range of waterproof skirtings.

SHAPE 2

INSTALLATION TOOLS FOR SKIRTINGS

One4All Glue QSGLUE290 290 ml

Multi-purpose glue that ensures adhesion to all materials and substrates. Average usage: 1 tube for 15 m of skirtings.

Plugs **NEPLUG**

Connection pieces for standard skirting and parquet skirting. One package contains 24 connections for inside and outside corners + 24 connections for straight stretches.

Incizo profile - Click/Click+ QSVINCP(-) 2000 x 45 x 8 mm Multifunctional finishing tool to finish your Click/Click+ floor and stairs in matching colours. Simply cut the Incizo basic profile to the desired shape with the supplied Incizo knife. Patent pending. Contains 1 Incizo profile, 1 Incizo knife and 1 plastic rail.

APPLICATION 1

Connect two floors of different heights.

Connect two floors of the same height.

Finish your floor along walls or windows. Cut in half to cover twice the distance with one profile.

Create a nice transition between your Vinyl Flex floor and other flooring types or finish along sliding doors.

Incizo profile / Incizo aluminium subprofile for stairs - Click/Click+ QSVINCP(-) / NEVINCPBASE1 2000 x 45 x 8 mm / 2000 x 33 x 17 mm

APPLICATION 5
Finish your stairs and steps.

The Incizo profile also allows you to finish your Click/Click+ stairs and steps in the flooring design of your choice. For this application, you need the Incizo profile and an aluminium subprofile. Subprofile to be ordered separately.

ALUMINIUM FINISHING PROFILES

METAL FINISHING PROFILES FOR STAIRS

FINISHING TOOLS

Coloured kit QSKIT(-) 310 ml

This elastic, acrylic-based paste is the ideal solution to fill joints between skirtings and walls. Also ideal for all Quick-Step joints that can't be finished with skirtings, profiles or pipe covers. Available in matching colours.

Average usage: 1 tube for 15 m angle joints.

Hydrokit QSKITTRANSP 310 ml

Transparent silicone to seal small joints where no expansion gap is needed.

Average use: 1 tube for 25 m angle joints.

Pipe covers QSRCINOX15 / QSRCINOX22 2 pcs/pack

Stainless steel covers to nicely finish pipes and heating elements. Available in inside diameter sizes of 15 and 22 mm. Do not glue the covers to the floor, but install them floating.

MAINTENANCE

Cleaning product 2.5 L QSCLEANING2500 2.5 L

Cleaning product specifically developed for Quick-Step floors. Cleanses the surface thoroughly and safeguards its original appearance to maximise that 'new floor' experience.
